Naturally in addition to engaging with the LDP public consultation process as it directly affects us here in Newport, the Group has also sought to make its views known, so far as concerns the General Policy provisions of the NPA as are set out in the current statutory Deposit Draft Version of the LDP.

These submissions divide broadly into two areas : those concerned with housing policies, and those concerned with environmental and sustainability issues. Below you will find links to two articles setting out our formal submissions in both of these areas.
