Definition: A household space is the accommodation used or available for use by an individual household. Household spaces are identified separately in census results as those with at least one usual resident, and those that do not have any usual residents.

A household space with no usual residents may still be used by short-term residents, visitors who were present on census night or a combination of short-term residents and visitors.

Vacant household spaces, and household spaces that are used as second addresses, are also classified in census results as 'household spaces with no usual residents'
